About Me

I began my programming journey with **Java**, **C#, C++**, in **Unity** and **Unreal Engine**, which gave me a strong foundation in **problem-solving** and software development. In 2023, I shifted my focus to front-end development, where I've been actively building skills in **React** and **Next.js**. I'm currently working on portfolio projects to deepen my expertise and showcase my ability to create responsive, user-friendly web applications.

Work Experience

Front-end learning start

2023 - Present

Self-taught

Completed a comprehensive front-end development learning path, building proficiency in **HTML**, **CSS**, **JavaScript**, and **TypeScript**, and developing responsive web applications using modern frameworks like **Angular**, **React**, and **Next.js**. Gained hands-on experience with state management tools (**Context API**, **Redux Toolkit**, **Zustand**) and implemented polished UIs using **Tailwind CSS**, **SCSS**, **Material UI**, **Shadcn**, and **Bootstrap**.

Projects:
- **KheradKhan:** I learned to use **Next.js** in a bigger project. I created a more complex table component for managing data. I also got a better understanding of **Shadcn** components. I am working on user authentication and data management.
Github repo: https://github.com/MrAghaei/kheradkhan-v2

- **7Host Interview Task:** I had one week to complete this task with **Bootstrap**. It was my first time using it, making it a nice challenge for me. I also learned how to optimize **SEO** using **Next.js** It showcases my skills in building modern web applications using **Next.js, Bootstrap,** and **SCSS**.
Github repo: https://github.com/MrAghaei/7host-interveiw-task

- **NovinDev Interview Test Project:** This project is a test assignment for an interview at NovinDev. It demonstrates how to interact with a **RESTful API** using Reqres.in. I implemented a mock **CRUD** with the **API**. I learned how to use the API and manage different requests.

Game Designer

2022 - 2023

Nouranium - remote

- Worked on 13 Hyper-casual & Arcade-idle game ideas
- Managed projects, wrote and prioritized tasks in Notion
- Designed and presented ideas
- Daily analysis of the game market in AppMaginc & SensorTower
- QA tested games and documented bugs and issues

Graphic Designer & Content Manager

2021 - 2022

curlfans.com.au - Remote

- Managed and wrote content
- Designed banners and graphic elements

Skills

CSS, HTML	React	Material UI
JavaScript	Next.js	Tailwind
TypeScript	SCSS	Shadcn
